ARCHITECTURAL ALUMINUM SYSTEMS

// We at Alutech do things a bit differently...

Our culture and values are defined by our actions and activities.

Our people are the best in the market, nothing is too much trouble for them.

Customers provide feedback that we take action on and implement.

Our goal is to provide a 'great' level of service, to make sure that people have a better day than they would otherwise have done. Whether that be our customers, staff, suppliers, or other people connected with the business.

We provide answers to questions, make achievable promises, let you know if an issue should arise whilst keeping a cool calm head.

We provide a little surprise every day to our clients—excellent and ongoing service, not just in sales and operations, but finance and process—our people are here to provide a little greatness every day.

Oh and our products are pretty good as well. //

Steve Hudson,
Managing Director
of the ALUTECH Systems

ALUTECH Group of companies

AluminTechno JLLC

AluminTechno JLLC is one of the manufacturing enterprises of ALUTECH Group of companies that specializes in the production of the extruded aluminium profiles, powder coating and anodizing.

A highly efficient advanced enterprise is equipped with the production facilities from the leading manufacturers from the USA, Germany, Italy, etc. Some of the technological processes and elements of the production equipment have no analogues in the CIS countries.

AluminTechno JLLC has implemented a complete production cycle: from melting of the primary aluminum to the production of the extruded profiles, their powder coating or anodizing.

The main production facilities consist of the modern foundry shops, high-tech press lines, advanced powder coating and anodizing lines.

ALUMINIUM
PROFILE SYSTEMS

- Unitised facade systems
- Facades systems
- Cladding systems
- Commercial window and door systems
- Residential window and door systems
- Non-thermally broken window and door systems
- Sliding systems
- Fold and slide systems
- Internal partitioning systems
- Fire-rated systems
- Louvre and brise soleil systems
- Shop front systems
- Skylight systems

Alutech Incorporated LLC

ROLLER SHUTTER SYSTEMS

Insulated domestic roller garage doors
Commercial roller shutters
Roller door components and automation

Alutech Doors Systems LLC

SECTIONAL DOORS

Domestic sectional garage doors
Industrial sectional garage doors
Wicket and personnel/side doors
Bespoke design variations

GARAGE DOOR AUTOMATION

Garage door operating system
Accessories

AluminTechno JLLC

Nowadays, AluminTechno JLLC produces a wide range of aluminum profiles (over 1000 different configurations), which are used in the automobile and machine tool industry, aviation, building, energetics, furniture and light industry, architecture.

The overall production capacity of AluminTechno JLLC are:

- extrusion lines: more than 45 000 tons per year;
- powder coating lines: more than 35 000 tons per year;
- anodizing workshops: more than 10 000 tons per year;
- melting shops: 55 000 tons per year.

The first company of ALUTECH holding was founded—ALUTECH LLC (Minsk). The main activity: the installation of the ready-made roller shutters, on-site production of the accessories.

Balcony system was launched

Non-thermally broken systems as well as interior partition systems were launched

Thermally broken systems as well as facade systems were launched

Patio doors

ALT SL160

LIFT & SLIDE
DOORS

ALT SL160 lift and slide system is a modern solution for glazing of large openings in premium buildings. The functionality of the system is provided by its way of opening—the leaf does not occupy the inner space, releases large opening and allows to combine several rooms or a room with a terrace.

ALT SL160 system gives architects and designers vast opportunities in designing of large openings—thermally insulated lift and slide doors can replace a wall, have high burglar resistant characteristics, improve the illumination of residential premises and save useful area.

TECHNICAL CHARACTERISTICS

Acoustic performance	up to 43 dB
Frame mounting depth	160 mm
Thermal insulation	1.0 W/m ² ·°K
Sash mounting depth	72 mm
Air tightness	Class 4
Maximum glazing thickness	54 mm
Water tightness	600–750 Pa (Class 9A)
Maximum sash weight	440 kg
Burglar resistance	WK2
Maximum sash height	up to 3300 mm
Maximum sash width	up to 3200 mm

Patio doors

ALT BF73 BI-FOLDING DOORS

BF73 system of bi-folding panoramic doors is a modern exclusive solution designed for residential houses, as well as commercial buildings with café entrances and restaurant terraces, showrooms and meeting rooms in business centers and hotels.

TECHICAL CHARACTERISTICS

Acoustic performance	up to 36 dB
Frame mounting depth	73 mm
Thermal insulation	0.6–0.73 W/m ² ·°K
Sash mounting depth	73 mm
Air tightness	Class 4
Maximum glazing thickness	44 mm
Water tightness	600 Pa (Class 9A)
Maximum sash weight	120 kg
Burglar resistance	WK2, PAS24
Maximum sash height	up to 3 000 mm
Maximum door length	up to 6 500 mm
Maximum sash width (while using of the frame connector)	up to 1 200 mm (up to 16 800 mm)

ALT F50 INTEGRATED LARGE-SIZE SASH

TECHNICAL CHARACTERISTICS

Sash height	up to 4 m
Sash width	up to 2 m
Sash weight	up to 350 kg
Hardware options	ALUTECH
Automatics	D+H
Thermal insulation	$U_f < 1.0 \text{ W/m}^2 \cdot \text{K}$

ALT F50

FACADE
WINDOW SYSTEM

The system of the integrated facade windows corresponds to all modern technological requirements, architecture and thermal insulation characteristics. The variety of glass fixation solutions allows to implement any customer requirements.

Glass fixation with the help of the glass bead profile

Hidden sash
with pasted glazing

Window with glass fixation
by the bounding profile

Slight smoke removal hatch

ALUTECH new products

ALT F50 MODIFICATIONS AND VARIANTS OF IMPLEMENTATION

TRADITIONAL CURTAIN WALL ALT F50

This system allows to create diverse types of translucent building envelope of various degree of complexity.

TECHNICAL CHARACTERISTICS

Acoustic performance	up to 48 dB
Thermal insulation	$U_f < 1.0 \text{ W/m}^2\cdot^\circ\text{K}$
Air tightness	Class A
Water tightness	Class A
Interior visible width	50 mm
Exterior visible width	20/38/50 mm
Glass thickness	4–62 mm
Maximum glazing weight	up to 700 kg

ALT F50SG STRUCTURAL GLAZING

Completely glazed facade of any configuration without aluminium profiles from the outside. Fixation of the glazing is carried out with the help of invisible end clamps.

ALT F50SSG IMITATION OF STRUCTURAL GLAZING

The main aesthetic difference of this facade solution is the absence of 50 mm clamping covers and decorative caps. Thin and almost invisible from the outside, clamping bar profiles are used instead. Plain glass adjoining profiles create the illusion of structural glazing.

ALT F50HL 'HORIZONTAL LINE' SEMI-STRUCTURAL GLAZING

Combination of the traditional and structural glazing. Various concealed cleats are applied in one of the directions either horizontal, or vertical one.

ALT EF65

UNITIZED
FACADE

TECHNICAL CHARACTERISTICS

Unit height	3600 mm
Unit width	2700 mm
Unit weight	up to 500 kg
Thermal insulation	$U_f < 1.0 \text{ W/m}^2\cdot\text{K}$
Camera depth of the frame profiles and transom bars	125/150 mm up to 200 mm
Glazing thickness	up to 56 mm

ALUTECH new products

ALT W72 WINDOW SYSTEM WITH HEIGHTENED THERMAL INSULATION AND ACOUSTIC CHARACTERISTICS

ALT W72 window is a modern and innovative solution for aperture glazing, that allows significantly increase energy efficiency and functionality of the premises and building itself. Besides that it provides the high level of convenience, comfort and aesthetic appearance.

Classic window

Coplanar sash

Outward opening sash

TECHNICAL CHARACTERISTICS

Acoustic performance	up to 48 dB
Thermal insulation	$U_f \leq 1.0 \text{ W/m}^2\cdot\text{K}$
Air permeability	Class 4
Water tightness	Class E1050
Resistance to wind load	Class CE2400
Maximum sash weight	150 kg
Frame mounting depth	72 mm
Sash mounting depth	80 mm
Maximum glazing thickness	50 mm
Maximum sash height	up to 2 500 mm
Maximum sash width	up to 1 700 mm

ALT W72HS

THERMALLY BROKEN WINDOWS:
'HIDDEN SASH' TYPE

ALT W72HS system is intended for the production of windows and belt stained glass. ALT W72HS windows meet the most strict architectural and design requirements due to a completely hidden sash, maximum glazing area, identical visual appearance both in fixed and opening parts.

ALT W72R

ALT W72R window system with the heightened thermal insulation characteristics is intended for assembling the windows in facade apertures with the wall insulation from the inside. The simplicity and safety of the installation process allow to use ALT W72R system while restoration or reconstruction. A variety of window installation solutions provides ample opportunities for arranging of any type of aperture.

ALUTECH new products

ALT W72

THERMALLY BROKEN TERRACE DOOR
WITH LOW THRESHOLD

ALT W72 terrace door is an optimal and functional solution for the arrangement of the balconies and terraces. The minimal threshold height corresponds to the unimpeded access regulations. The sash design options as well as the perimeter locking application allow architects and designers to implement the most suitable and aesthetic solutions for the arrangement of balconies and terraces.

ADVANTAGES

High thermal insulation characteristics
(U_f up to $1.0 \text{ m}^2 \cdot \text{K/W}$)

The height of the threshold (20 mm) corresponds to the European standards

Perimeter locking (for tilt and turn and side hung windows with visible or concealed hinges)

Secure and tight sealing

Easy in profile processing, assembly and installation

The geometry of the seals in conjunction with the threshold profiles form a continuous front surface line that guarantees convenience in operating and service

Various sash design options

ALT W72

DOOR SYSTEM WITH INCREASED THERMAL INSULATION AND ACOUSTIC PERFORMANCE

ALT W72 doors demonstrate excellent thermal insulation characteristics and ideally suit the buildings with high requirements to energy efficiency and design.

Aesthetic design perfectly combines with ALUTECH facade and window systems.

Door with thermally insulated threshold

Door with automatically drop-down threshold
